

Green Class Insider

MY AMAZING BODY

After a brief initial phase-in period, the children in the Green Class (綠班) dived right into learning about the "My Amazing Body" (奇妙的身體) topic. We started with the body parts we are most familiar with and then moved on to more complicated ones such as belly button, palm, and knee. Through small and whole group activities, children were able to apply what they've learned in a hands-on manner. What a pleasure to see how these children have become more comfortable with the daily routine.

Children around this age begin to bond with each other through parallel play which is their way to get to know each other and observe what others like to do. We are delighted to see bonds start to form gradually among the children!

✨ Our Main Focus ✨

We spent the first few days helping children get used to the school routine but very quickly, children were able to follow directions and participate actively in class activities. To ensure that children develop positive relations with their peers and teachers, we played games that help children learn each other's names, and created group projects such as a class "rainbow road." We had a blast exploring our body parts and five senses by engaging in topic-related activities such as smelling different objects, learning how to plank, and measuring our waist.

❖ Topic Learning Stations ❖

Topic learning station time is our favorite at school! Every day, children are presented with 2 to 3 topic-related learning station choices. We traced our hands and counted our fingers, we observed our own fingerprints using magnifying glasses, we made a face with fruit, and we got messy with Oobleck.

❖ Experiential Learning ❖

Children visited our experience room every week and there was never a dull moment during the visit. We play dress up using hats, sunglasses, and headbands, guess the smell of different items, feel the sensory wall, and pretend to be doctors and dentists. As the fall season approaches, we also went on a "trip" to our Ya Ya Farm to pick apples, pumpkins, and feed farm animals. These real-life activities have made our school experience extra colorful!

✦ Ya Ya Sports Day ✦

We had our first excursion at a spacious movement studio upstairs. The Green Class officially met the Yellow Class and enjoyed our Ya Ya Sports Day together. Everyone was jumping, running, trying their best to go through obstacles. What an amazing way to keep us active and also create a sense of community for all the children and teachers in our school!

❖ Extra Sweet Moments ❖

To many children in our class, it is their very first school experience. We are so proud to see them adjusting so well in such a short period of time. Now everyone is an expert in lining up and they know each other by name. Children enjoyed the special treat Leo brought to share and we were thrilled to celebrate Alex's 3rd birthday like a big family!
